

# Single line filters for fuel oil

### **Application**

For single-line systems with return line (version R 500) or without return line (version V 500). Suitable for fuel oil EL (DIN 51603-1), diesel fuel (EN 590), liquid fuels as per DIN SPEC 51603-6 and DIN/TS 51603-8 as well as biofuel and biodiesel with a maximum of 30 % FAME (EN 14214). This product is therefore ideal for all ecologically upgraded fuel oil consuming systems that use the new paraffinic fuels HVO or GTL as an admixture or 100 %. Also for use in flood hazard areas and flood risk areas.

**Benefits** 

Ø 8/10 mm

30 % FAME

areas

Shut-off valve in the flow line

Proofed Barrier (odour-tight)

new paraffinic fuels HVO or GTL

Vent valve with hose connector in the return line (R 500)
 Impact-resistant, shock-resistant and transparent plastic filter cup
 Pipe connection via universal screw connection for pipes with

Materials resistant to biofuel and biodiesel mixtures with max.

• Watertight up to 10 m water column - ideal for use in flood hazard

Green fuels ready: suitable for use at tank facilities filed with the

## Description

Brass filter housing, filter cup made of transparent, impact-resistant plastic. With shut-off valve in the flow line. Version R 500 also features a vent valve with hose connector in the return line. Universal compression fittings for pipes with 8/10 mm outside diameters included. Watertight up to 10 m water column.

## **Technical specifications**

**Connection burner end** See ordering table

Connection tank See ordering table

Mounting position Filter cup vertically down

Operating temperature range Medium: Max. 40 °C **Operating overpressure** (suction mode only)

 Material

 Housing:
 Brass

 Filter cup:
 Plastic, transparent and impact-resistant

Approval Conformity certificate (ÜHP) as per EN 12514
