

Oil tank conversion kit II + III for rainwater harvesting in gardens

Benefits

- Conversion kit as extension for inner linings for rainwater tanks during for conversion of fuel oil storage tanks to rainwater storage tank
- For roof area up to 75 or to 210 m²

Application

Oil tank conversion made easy. We supply a number of special rainwater components for quick and easy installation of rainwater harvesting systems. The tank cover is the most important component of the kit as it enables simple and clean piping through two openings. The pipe is routed from the downpipe to the tank top and connected to the filter system. Depending on the site conditions and the available space in the manhole, it is recommended to install a downpipe filter or a cartridge filter. Pipe couplers are used to connect the filter elements. The pipe to the sewage system must form a siphon using the drain pipe elbows. A self-priming jet pump with integrated pressure and dry run protection is ideally suited for water withdrawal.

Versions

	Part no.
Oil tank conversion kit II	53076
Oil tank conversion kit III	53077

Technical specifications

Scope of delivery

Oil tank conversion kit II:

- Plastic manhole cover ø 500 mm
- Rainus downpipe filter with 2 pipe couplers (DN 100)
- Calmed inlet

Oil tank conversion kit III:

- Plastic manhole cover ø 500 mm
- Cartridge filter PF with 2 pipe couplers (DN 100)
- Calmed inlet
