

CO detection CAPs® sens CO 30

Application

- CO detection and concentration measurement
- Application in boiler rooms or at flue gas pipes, for example for self-protection during flue gas line tests

Versions

CO detection CAPs® sens CO 30 M090163310

Blue part no. = in-stock items

Description

Sensor module with electro-chemical sensor for fast and reliable detection of CO (carbon monoxide) in ambient air. The CO concentration is displayed by the evaluation unit as CO value in ppm; the CAPBs® measurement unit provides an audible signal when the alarm threshold is exceeded.

Technical specifications

Dimensions

W x H x D: 42 x 64 x 35 mm

Weight

Measuring range 0/2,000 ppm

Accuracy

± 5 ppm (up to 50 ppm)

 $\pm~5~\%$ of measured value (above 50 ppm)

Resolution

1 ppm

1/1
